

WOOD WITHOUT COMPROMISE

MOHAWK PRESENTS REVWOOD PLUS FOR MULTIFAMILY SOLUTIONS

RevWood Plus combines the power of three proprietary technologies to create a revolutionary waterproof flooring system that allows wood flooring to be installed in any room of the house, even kitchens and baths. Uniclic® maintains constant tension between planks for tight joints that trap liquids on the surface, protecting the floor and subfloor. Hydroseal™ coats the perimeter of each plank to resist swelling from moisture, and GenuEdge® pressed bevels allow the surface visual and protective coating to wrap around the plank's edges, enhancing the hardwood realism while protecting the core from moisture.

Selling Features

- Waterproof flooring system
- Uniclic® locking joint for easy floating installation
- GenuEdge™ pressed beveled edges
- Hydroseal™ perimeter coating
- Embossed in register (EIR) texture

Performance

- Tough wear layer to resist scuffs, scratches and dents
- Waterproof flooring system to protect floors and subfloors

Care

- Traps soil and spills on surface for easy cleanup
